

Date: _____

Existing Underground Services

Site Address: _____

To whom it may concern

STA Consulting Engineers ("Soil Test Australia") has been commissioned to undertake a site investigation for the above mentioned site address.

Due to the nature of the property and the position of the existing dwelling, there is a high possibility of underground services within the proposed test areas.

To ensure we do not disturb or damage any of these potential services, it is Soil Test Australia's policy that the owner or builder supplies us with an underground service plan indicating all, if any services. These can generally be obtained from the local authority or services such as dial before you dig.

Examples of services plans required:-

- Underground power
- Underground phone line/cable
- Sewer line
- Storm water/Roof water line
- Underground gas line
- Mains water

Alternatively the owner/builder can nominate the preferred test areas prior to our site visit.

Please be advised, whilst all care is taken, Soil Test Australia accepts no responsibility for damages to any underground services unless the exact position of the services are clearly identified. Where neither of the above are possible and it is still a requirement on our clients' behalf to continue with the site investigation, Soil Test Australia will require the owner /builder to sign and acknowledge the above to accept the responsibility for any damages that may occur.

We will NOT proceed with the site investigation until we have received this signed document and any corresponding information.

If you have any concerns, please do not hesitate to contact our Brisbane office.

Regards

STA Consulting Engineers ("Soil Test Australia")

I _____ require Soil Test Australia to continue with the soil investigation on the above mentioned site address. I understand that if no/insufficient information has been made available to Soil Test Australia with regards to underground services I/we will accept full responsibility for any damages that may occur to any potential services. I/we also accept full responsibility for any damages that may occur from my nomination of bore hole locations.
